- Standard dual, hot-swappable, redundant AC Power Supply
- Accommodates up to 4 Optical Transmitters / Receivers
- Available pre-loaded with Global Foxcom passive RF and optical components (optional)

Product Description

Global Foxcom's Sat-Light/Gold 7190M Chassis is a standard 19" 1RU enclosure designed to be installed in equipment racks where only limited rack space is available. The 7190M chassis can be populated with any combination of, up-to four, Sat-Light/Sat-Light Gold transmitters/receivers along with a variety of passive optical and RF components to provide a totally customized solution.

The 7190M Chassis is equipped with dual hot-swappable power supplies sufficient for any combination of transmitters and receivers as specified. Power to the two installed power supplies is via two separate AC connectors enabling the use of a backup power grid. Power supply LED monitoring for transmitter/receiver control is from the front panel. Discrete monitoring and alarms are accessible using a dedicated M&C connector. The 7190M chassis is field upgradable enabling the user to add future transmitters and receivers for increased capacity.

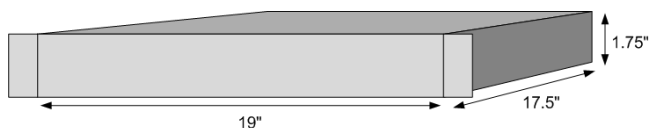

Sat-Light Gold Series

Specifications

7190M Chassis Kit

General Specifications	Units
Enclosure Capacity	Up to 4 units
Enclosure size	19" x 17.5" x 1.75"
RF Connector	F-Type, SMA, BNC
